TABLE RAW

id	name	description	type	priority	proje
1	Balanced analyzing forecast	Removal of Radioact Elem from Peritoneum, Perc Approach	other	medium	1
2	Diverse foreground info-mediaries	Alteration of R Shoulder with Autol Sub, Perc Approach	performance	medium	2
3	Progressive clear-thinking synergy	Dilate R Temporal Art, Bifurc, w 4 Drug-elut, Open	functional	hight	3
4	Expanded regional architecture	Supplement R Toe Phalanx Jt with Nonaut Sub, Open Approach	functional	medium	4
5	Public-key interactive software	Excision of Right Subclavian Vein, Perc Endo Approach, Diagn	other	hight	5
6	Networked exuding attitude	Extirpation of Matter from L Thyroid Lobe, Perc Approach	performance	medium	6
7	Adaptive regional instruction set	Revision of Ext Fix in R Metacarpocarp Jt, Perc Approach	performance	hight	7
8	Optional web-enabled migration	Revision of Nonaut Sub in Lumsac Disc, Open Approach	performance	low	8
9	Profit-focused system-worthy secured line	Tomo Nucl Med Imag of L Breast using Oth Radionuclide	performance	low	9
10	Proactive composite archive	Release Thoracic Nerve, Percutaneous Endoscopic Approach	performance	hight	10
11	Persistent neutral moratorium	Insertion of Monitor Dev into Esophag, Perc Endo Approach	other	hight	1
12	Diverse fresh-thinking leverage	Bypass L Great Saphenous to Low Vein w Synth Sub, Open	performance	hight	2
13	Optional fault-tolerant neural-net	Replacement of L Femur Shaft with Nonaut Sub, Open Approach	other	medium	3
14	Quality-focused fault-tolerant frame	Extirpation of Matter from Up Art, Bifurc, Open Approach	other	hight	4

TABLE RAW

id	name	priority	description	test_run	project_id
1	Cross-platform object-oriented moderator	low	Bypass L Com Iliac Art to B Renal A w Autol Vn, Open	3	1
2	Versatile intangible Graphical User Interface	medium	Reposition Right Renal Vein, Percutaneous Approach	13	2
3	Enhanced demand-driven implementation	low	Monitor Skin/Breast Vasc Perfus, ICG dye, Extern	3	3
4	Assimilated executive groupware	low	Removal of Autol Sub from L Ear, Extern Approach	3	4
5	Managed logistical task-force	low	Dilate R Com Carotid, Bifurc, w 4+ Intralum Dev, Open	4	5
6	Optimized incremental info-mediaries	high	Revision of Ext Fix in R Femur Shaft, Extern Approach	3	6
7	Vision-oriented well-modulated implementation	high	Excision of Right Acetabulum, Percutaneous Approach, Diagn	20	7
8	Grass-roots impactful product	low	Alteration of R Up Extrem with Autol Sub, Perc Approach	18	8
9	Innovative exuding protocol	medium	Drainage of Right Tarsal Joint, Percutaneous Approach, Diagn	1	9
10	Decentralized cohesive strategy	low	Revision of Int Fix in Coccygeal Jt, Extern Approach	4	10
11	Horizontal motivating moratorium	medium	LDR Brachytherapy of Trachea using Cesium 137	8	1
12	Reduced user-facing forecast	medium	Restrict R Ext Carotid w Intralum Dev, Perc Endo	18	2
13	Horizontal value-added concept	medium	Drainage of Lower Vein, Open Approach, Diagnostic	2	3
14	Horizontal multi-state solution	low	Revision of Infusion Device in Cranial Cav, Extern Approach	17	4

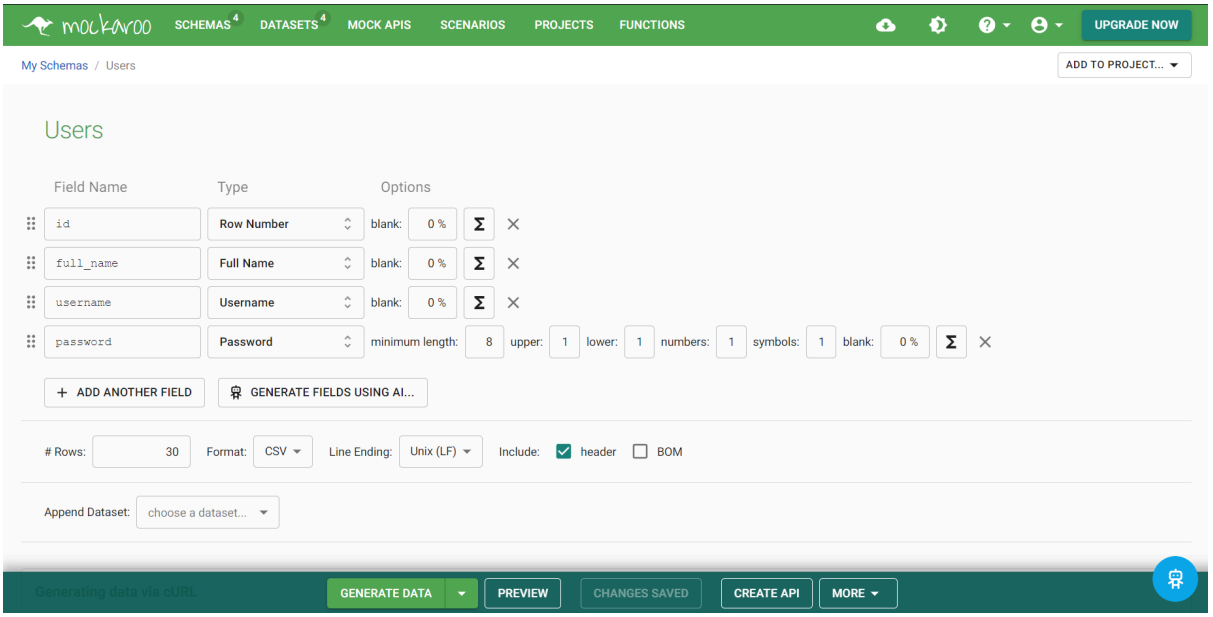
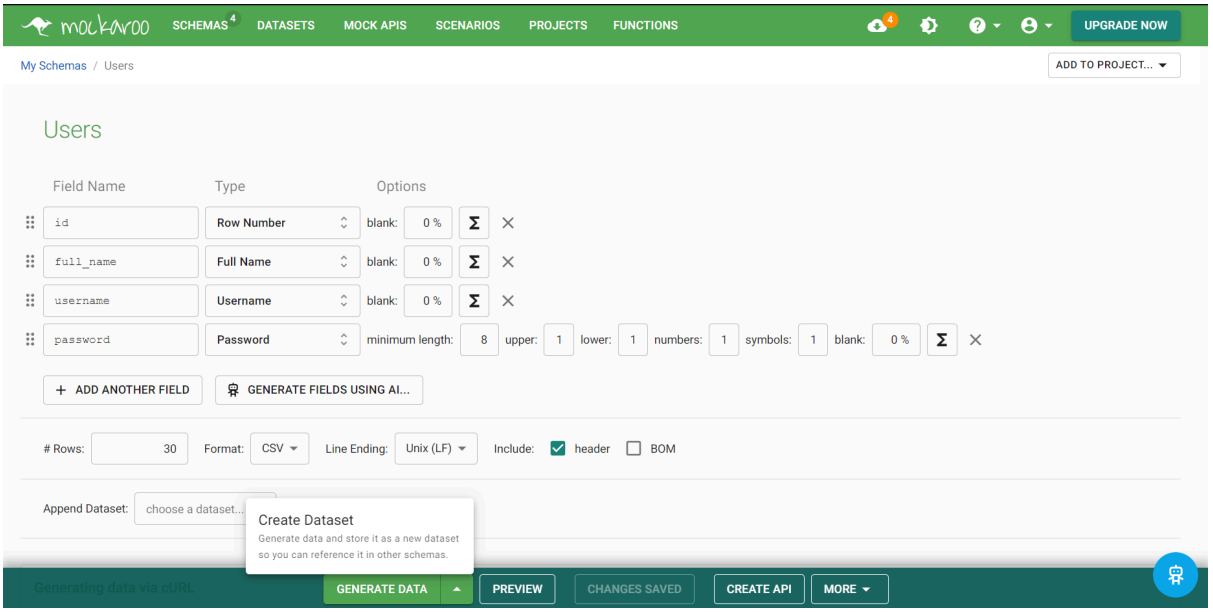
2. Data Generation Script

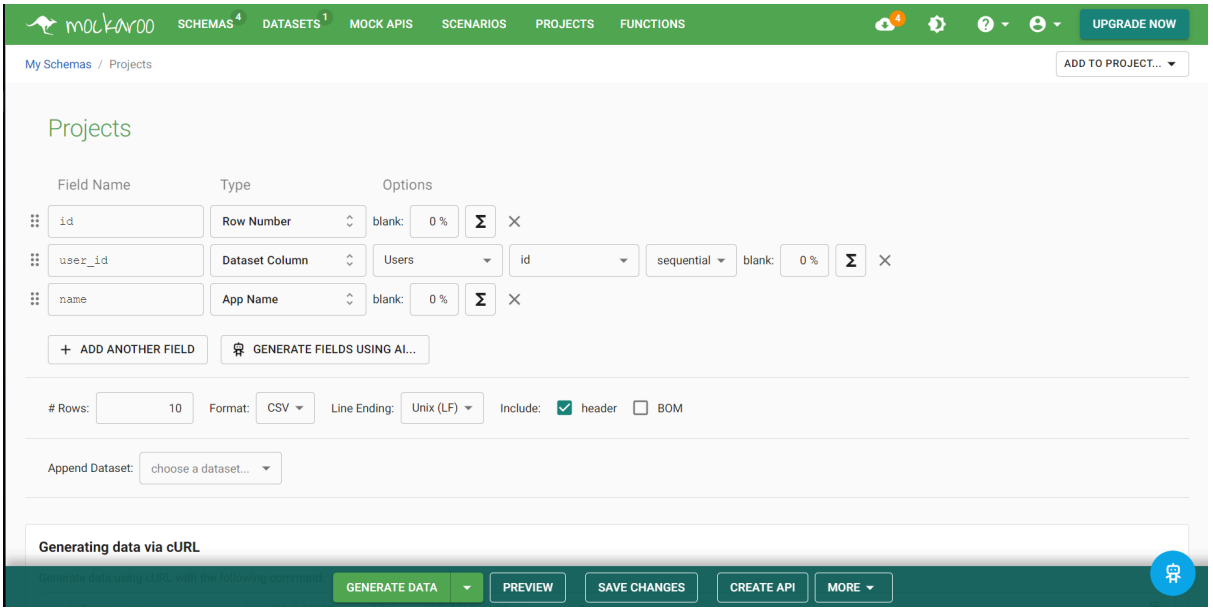
- **Data Generation Tool:** Mockaroo
- **User data generation:**
  - Step 1: Create a user schema with the following information. We need at least 30 users, so Rows will be 30. Click “Save As/Changes” to save schema



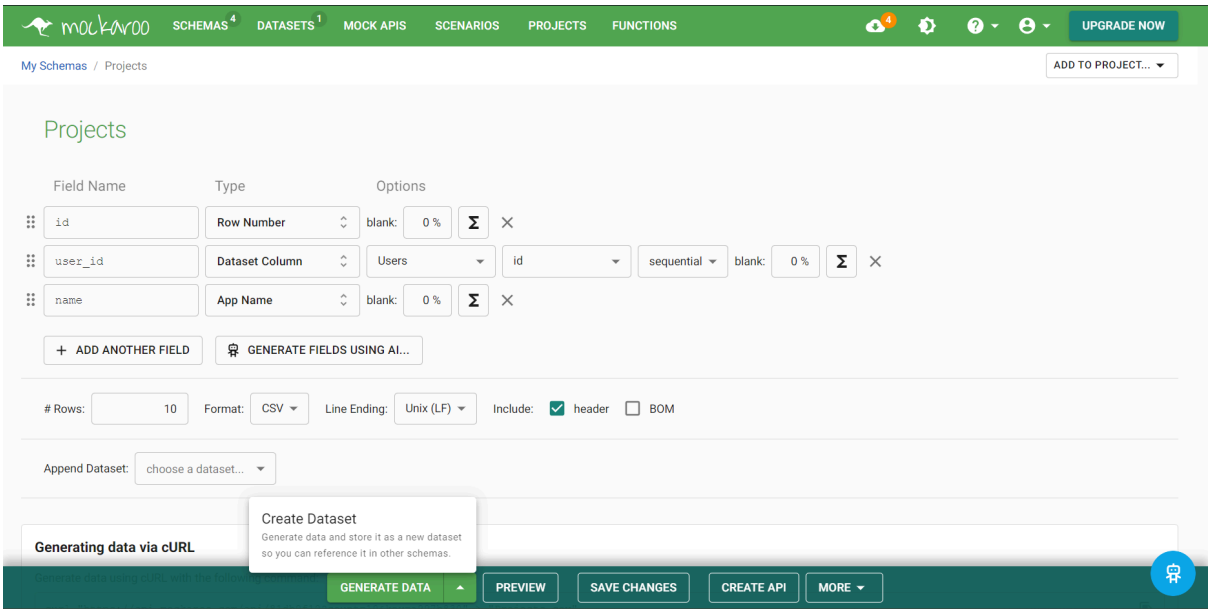
- Step 2: Click “Create dataset” to create dataset



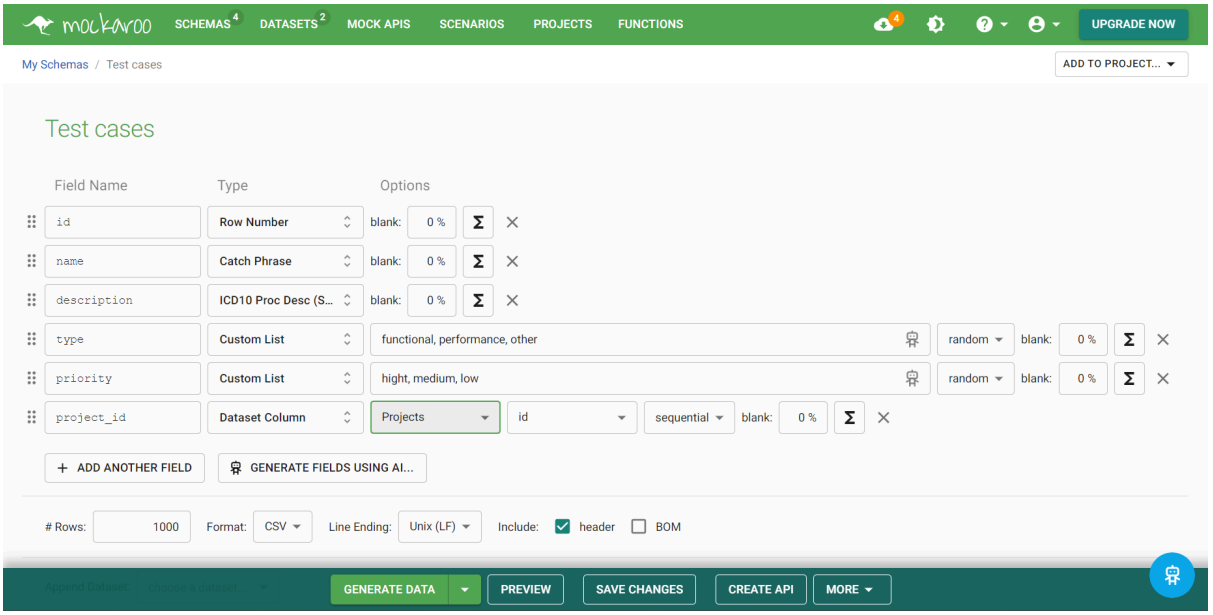
- **Project data generation:**
  - Step 1: Create a project schema with the following information. Here, we configure the user_id field to select id from the previously created user dataset. We need at least 10 projects, so Rows will be 10. Then click “Save As/Changes” to save the schema



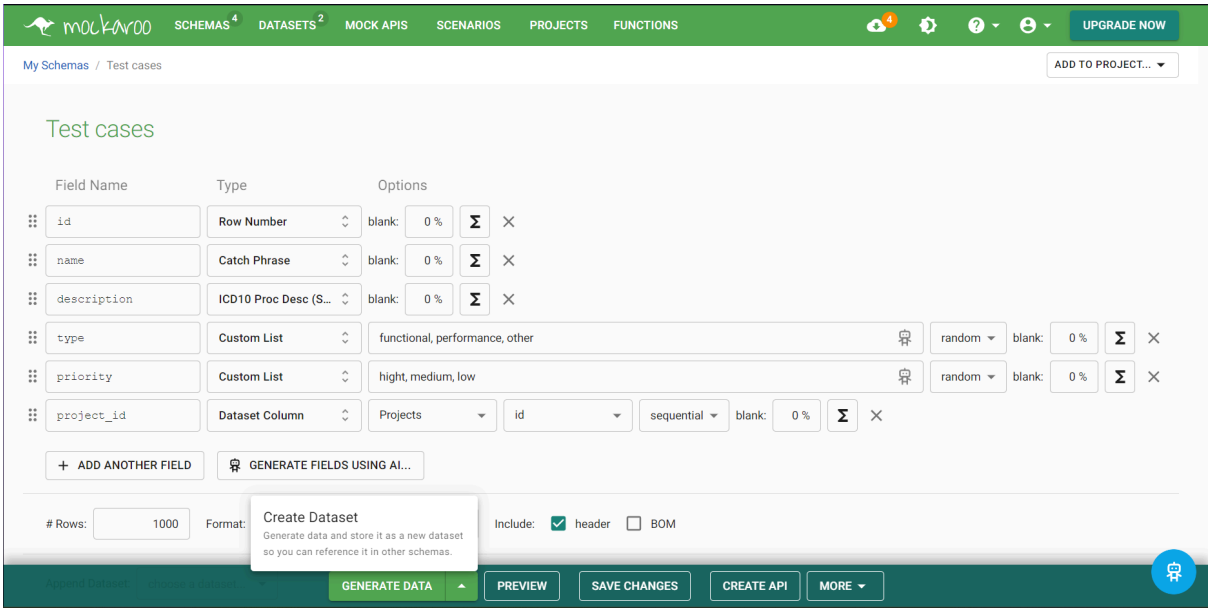
- Step 2: Click “Create dataset” to create dataset



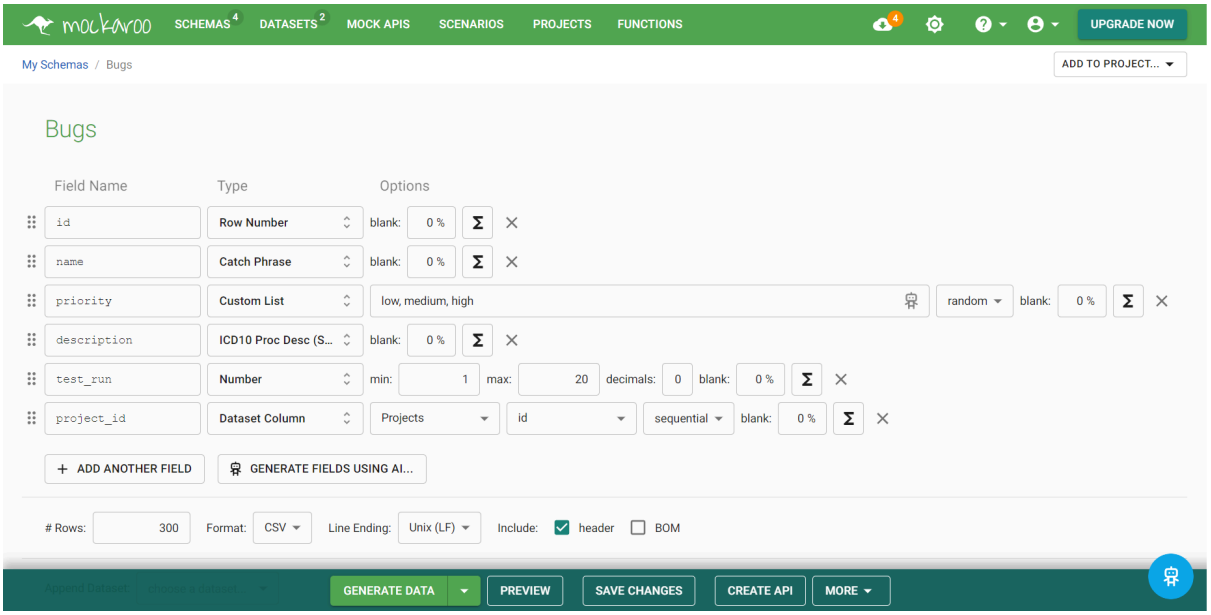
- **Test case data generation:**
  - Step 1: Create a test case schema with the following information. Here, we configure the project_id field to select id from the previously created project dataset. We need at least 100 test cases for each project, so Rows will be 1000. Then click “Save As/Changes” to save the schema

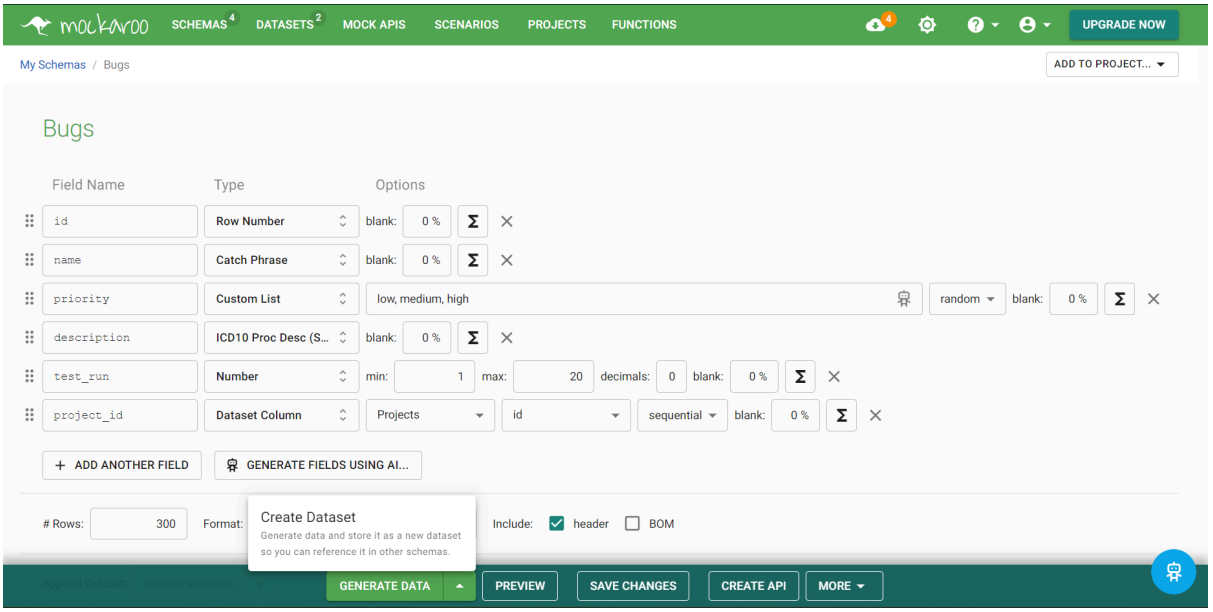


- Step 2: Click “Create dataset” to create dataset



- **Bug data generation:**
  - Step 1: Create a bug schema with the following information. Here, we configure the project_id field to select id from the previously created project dataset. We need at least 30 bugs for each project, so Rows will be 300. Then click “Save As/Changes” to save the schema





- Step 2: Click “Create dataset” to create dataset
